For over 60 years in the sheet metal processing and cold stamping sector.

A history of over 60 years accompanies the growth of the Boschetti Group, an Italian company in the field of sheet metal processing and cold stamping. Founded in 1956, the Group now comprises 3 companies and a brand: Boschetti Armando, BM Beta Meccanica, Beta Steel, and the Lasermio brand.

Although their main activity is the processing and stamping of sheet metal, the three companies have specialized in providing specific processes to specific market sectors.

The Group's production plants are located between Veneto and Abruzzo, thus serving Italian and foreign customers in the most efficient way and covering a total covered area of 23,000 square meters.

THE GROUP

BA 
BOSCHETTI ARMANDO

Founded in 1956, Boschetti Armando Srl is today a significant Italian company in sheet metal processing. Certified ISO 9001, ISO 45001, and ISO 14001 and equipped with the most modern technologies, it is capable of working for companies in the automotive, vending, heating and air conditioning, industrial electronics, automation, uninterruptible power supply, and many other sectors. The available machinery allows for the processing of iron, aluminum, brass, stainless steel, and copper sheets.

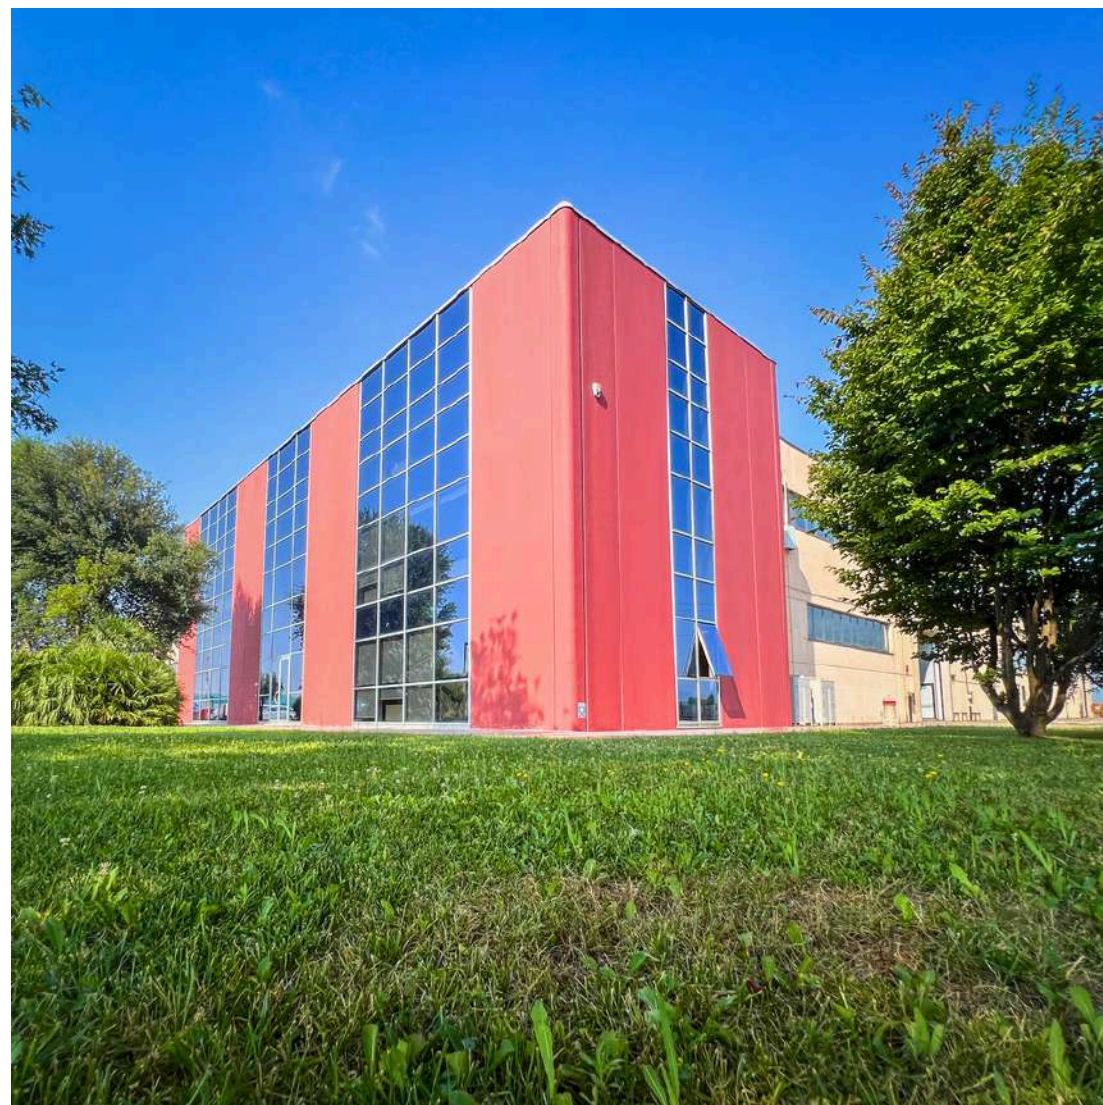

Divisions
THE GROUP

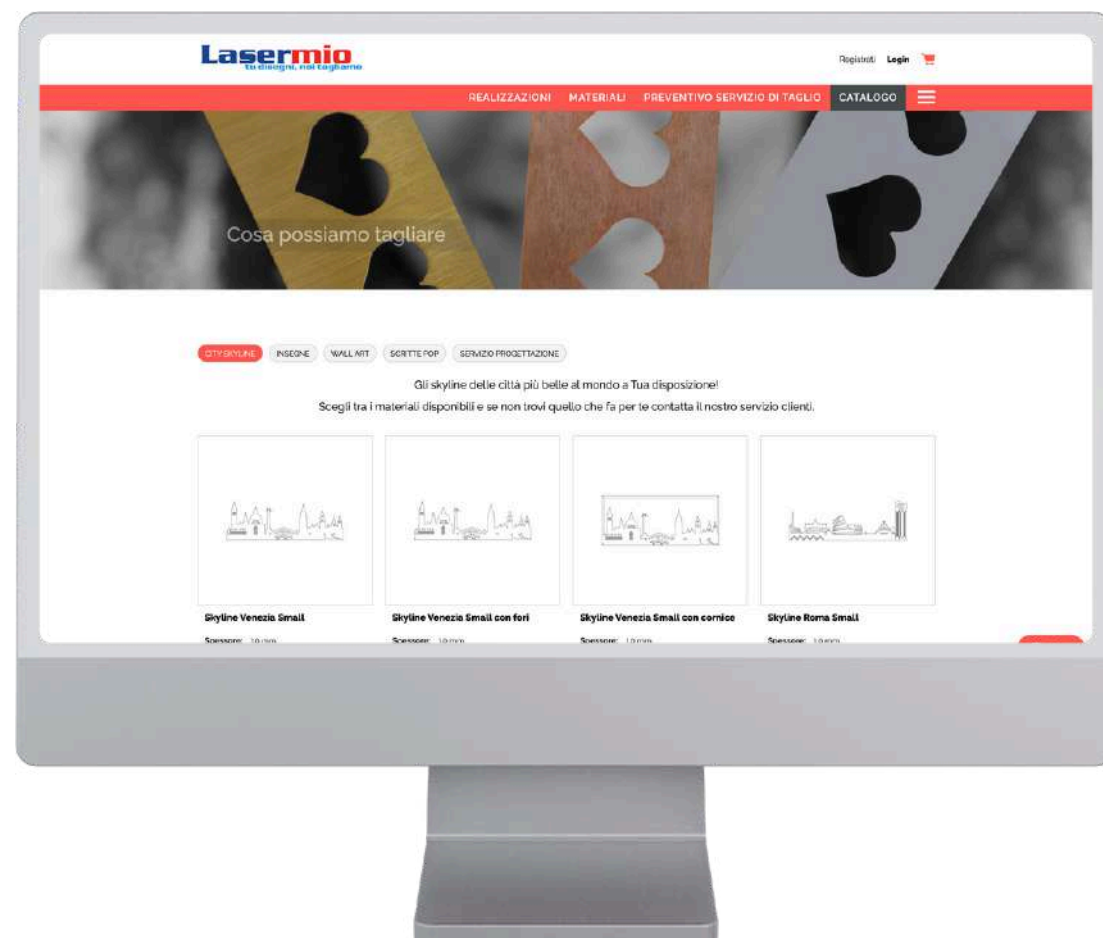

BM
BETA MECCANICA

BM Beta Meccanica Srl, founded in 2002 in the province of Chieti, has specialized mainly in the production of cabinets for slot machines, stove bodies, and aluminum structures and baskets for lifting systems, agricultural machinery, and earthmoving equipment. Following market demands, it has created partnerships with external design studios to combine technical know-how with a stylistic component. The company is characterized by its ability to weld and assemble products, even when this involves testing or complete assembly, providing the customer with "ready-to-use" products.

Divisions
THE GROUP

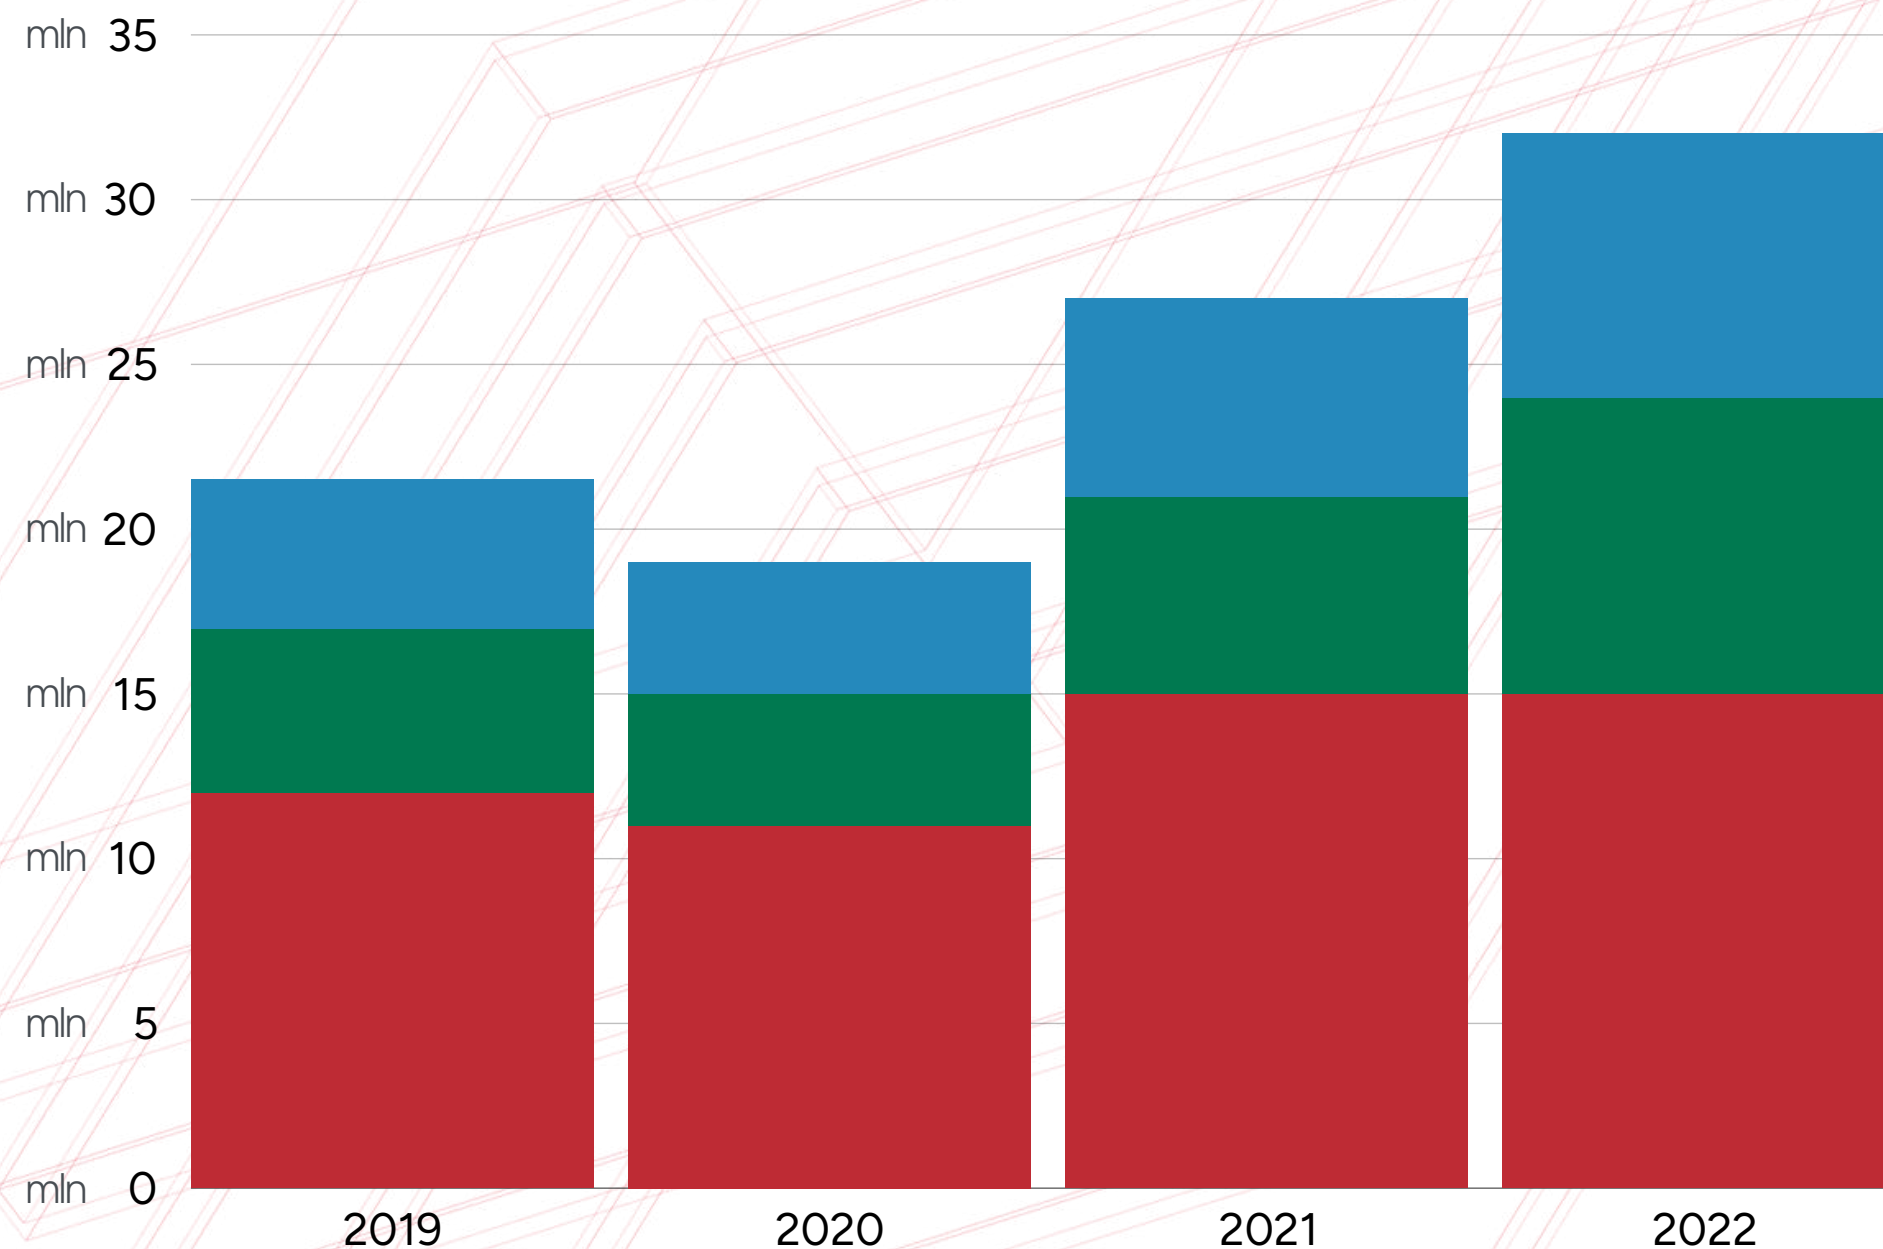

Beta Steel Srl specializes in the production of metal furniture for office interiors and the subcontracting of sheet metal components, mainly operating in the vending, heating, and air conditioning sectors. The company has developed solid know-how in the processing of pre-painted materials and thin gauges. The current plant, located in Lonigo (VI), covers over 11,000 square meters and houses punching and paneling lines, a modern powder coating plant, and areas for welding and assembly.

LASERMIO is the online laser cutting service created by the Boschetti Group. Leveraging the existing know-how and facilities, through this web platform it is possible to order laser-cut pieces directly from the website www.lasermio.com and get an instant quote. The pieces are delivered within 4 working days.

Steady growth also thanks to a strategy of diversification across multiple market sectors.

TURNOVER

Strength

1

Presence and long-standing tradition in the market, supported by financial solidity.

Machine park

2

Modern and comprehensive machinery for the most common sheet metal processing.

Qualified personnel

3

Highly qualified personnel capable of assisting clients in any design and production activity.

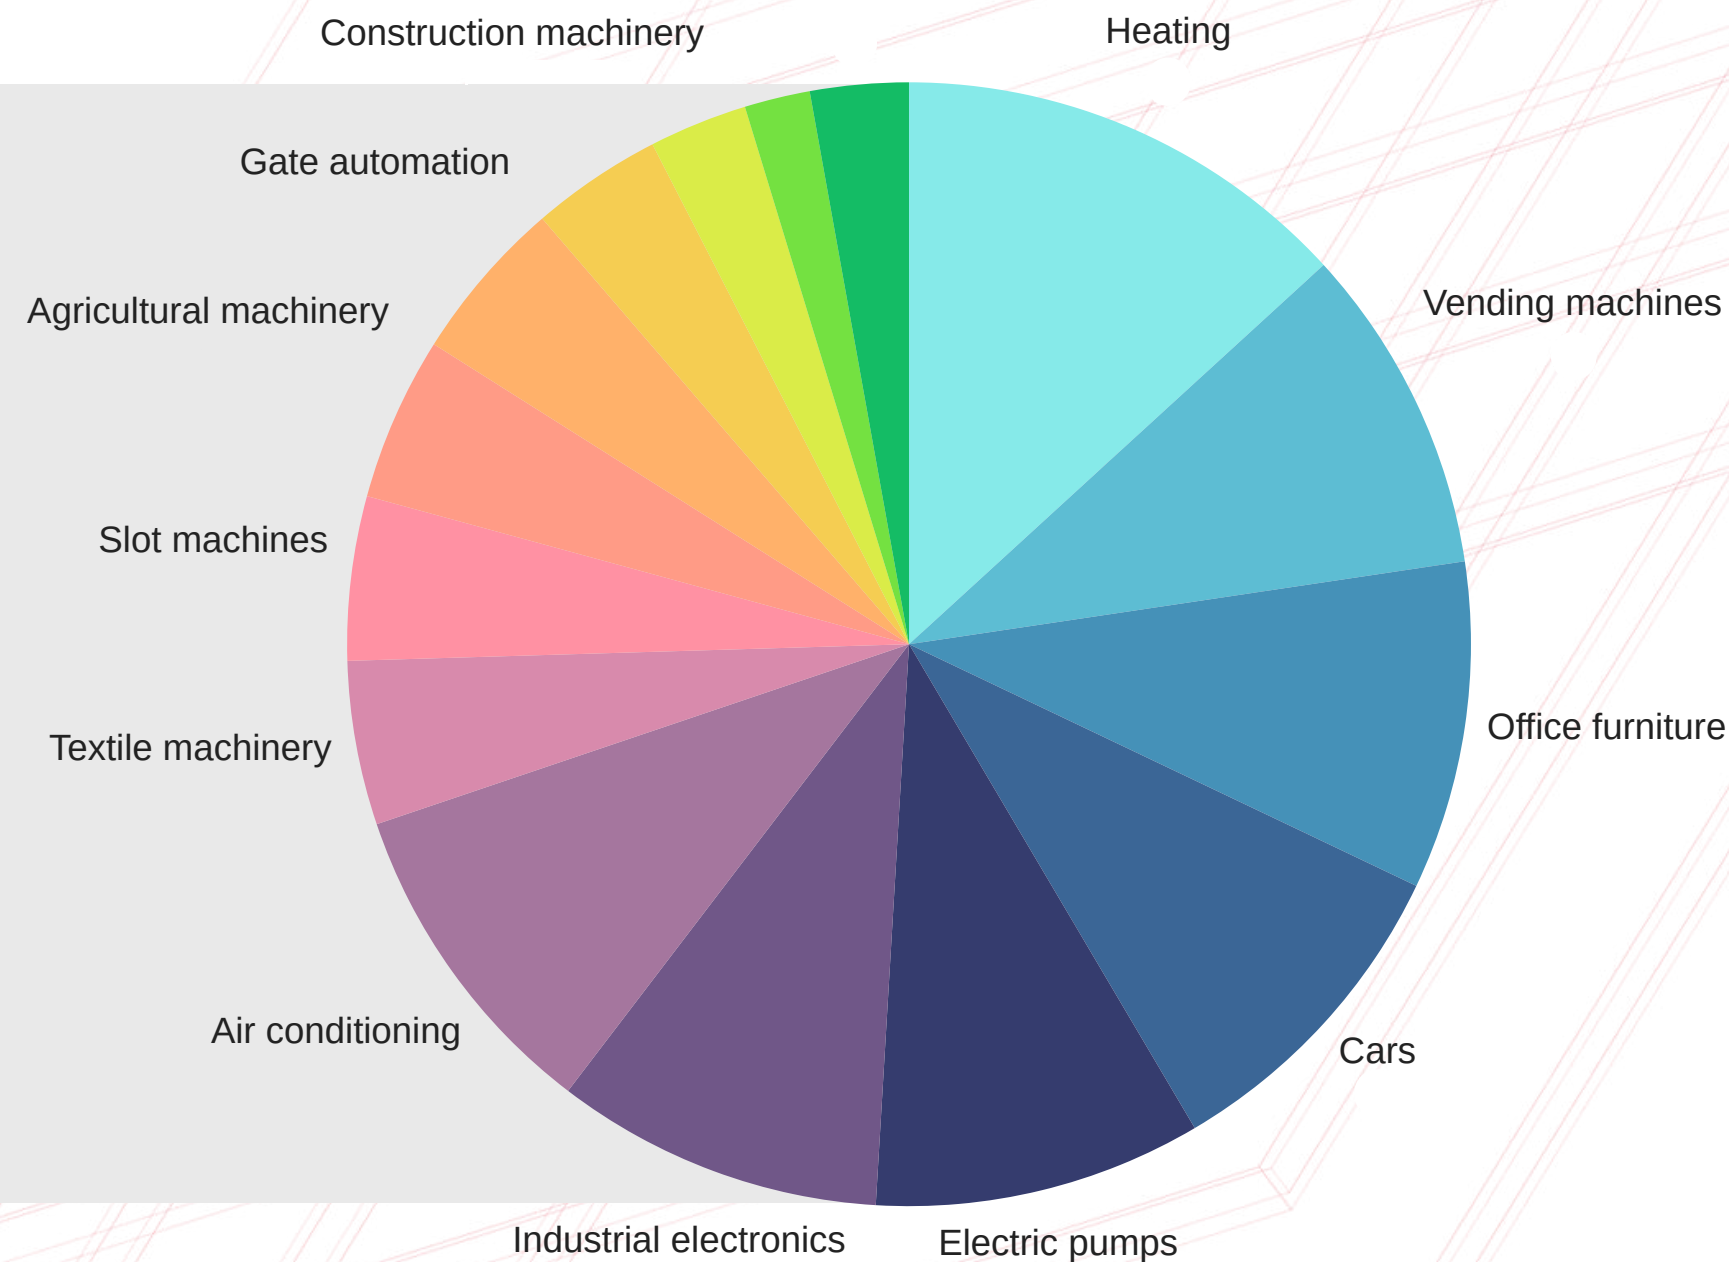

Three production sites

4

Implementation of Disaster Recovery and Business Continuity Plan procedures, supported by the existence of three production sites.

STRENGTHS

The Group currently operates in over 15 market sectors and stands out in supplying components for the automotive industry, industrial electronics and electromechanics, heating, air conditioning, refrigeration, medical and food machinery, construction machinery, and earthmoving equipment.

Square meters of covered production area

NUMBERS

The Boschetti Group
offers the following services:

Stamping and blanking

Laser cutting and punching

Bending and paneling

Robotized welding of steel and aluminum

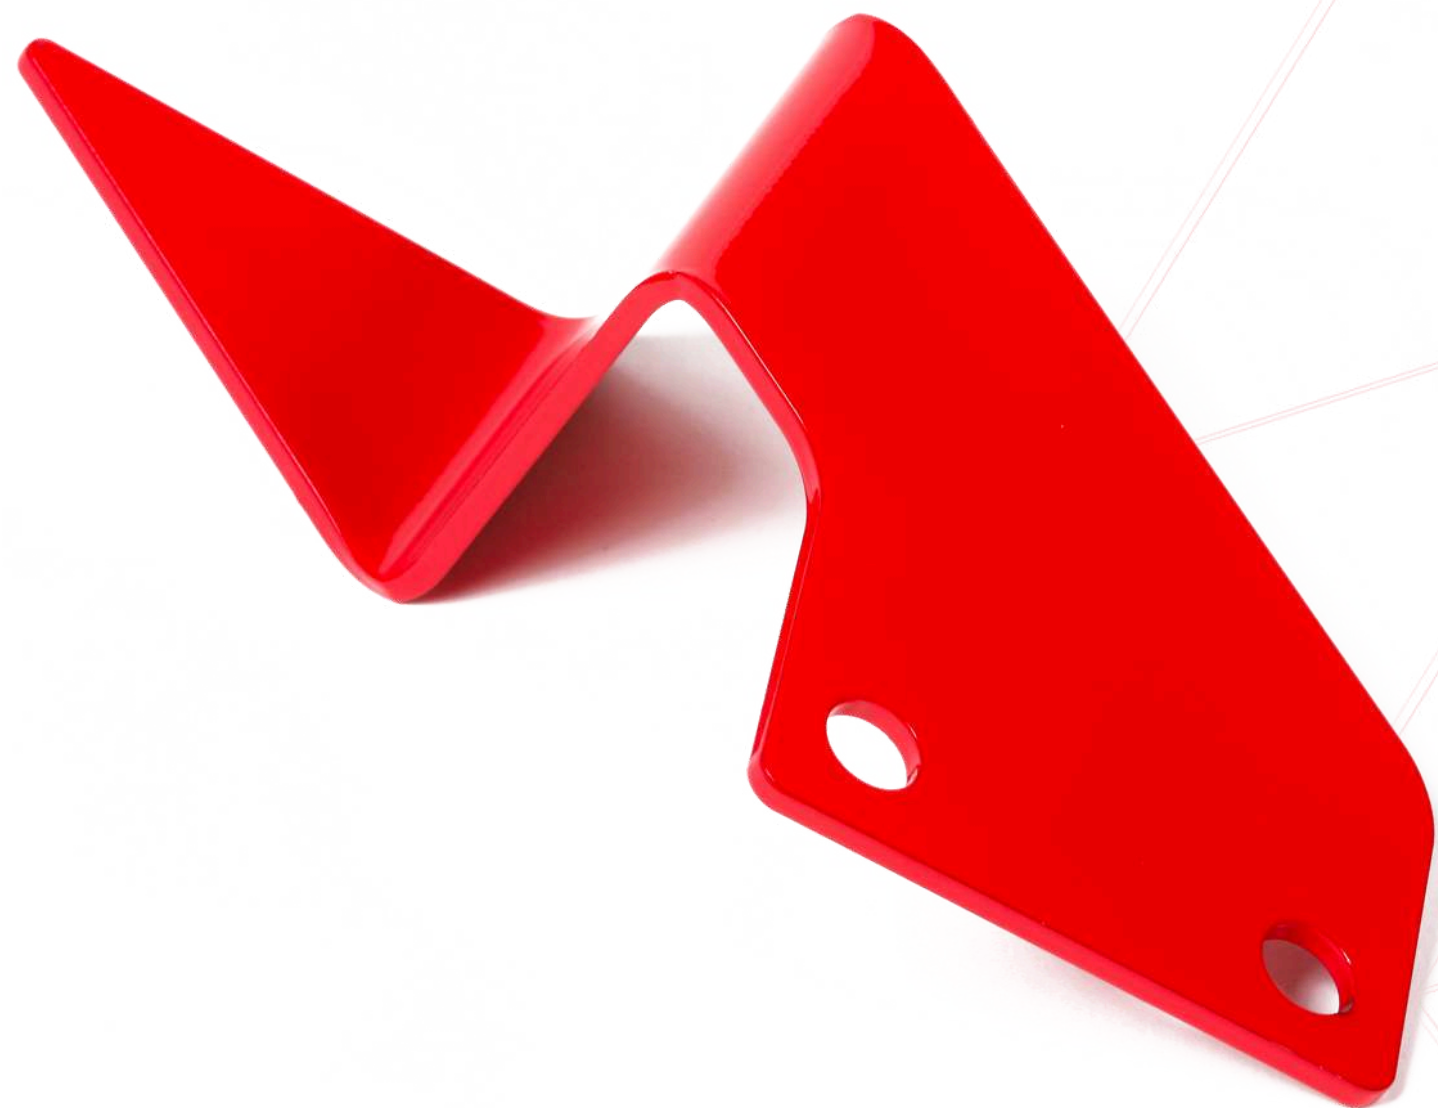

Mechanical machining

Powder coating

Additional processing

THE WORKS

Thanks to its machinery, the Boschetti Group is capable of laser cutting materials up to 20 mm thick. The latest generation fiber lasers also enable the processing of copper and brass. Numerous CNC press brakes with 6 - 8 axes allow for the processing of pieces up to 4 meters in length.

LASER CUT AND BENT

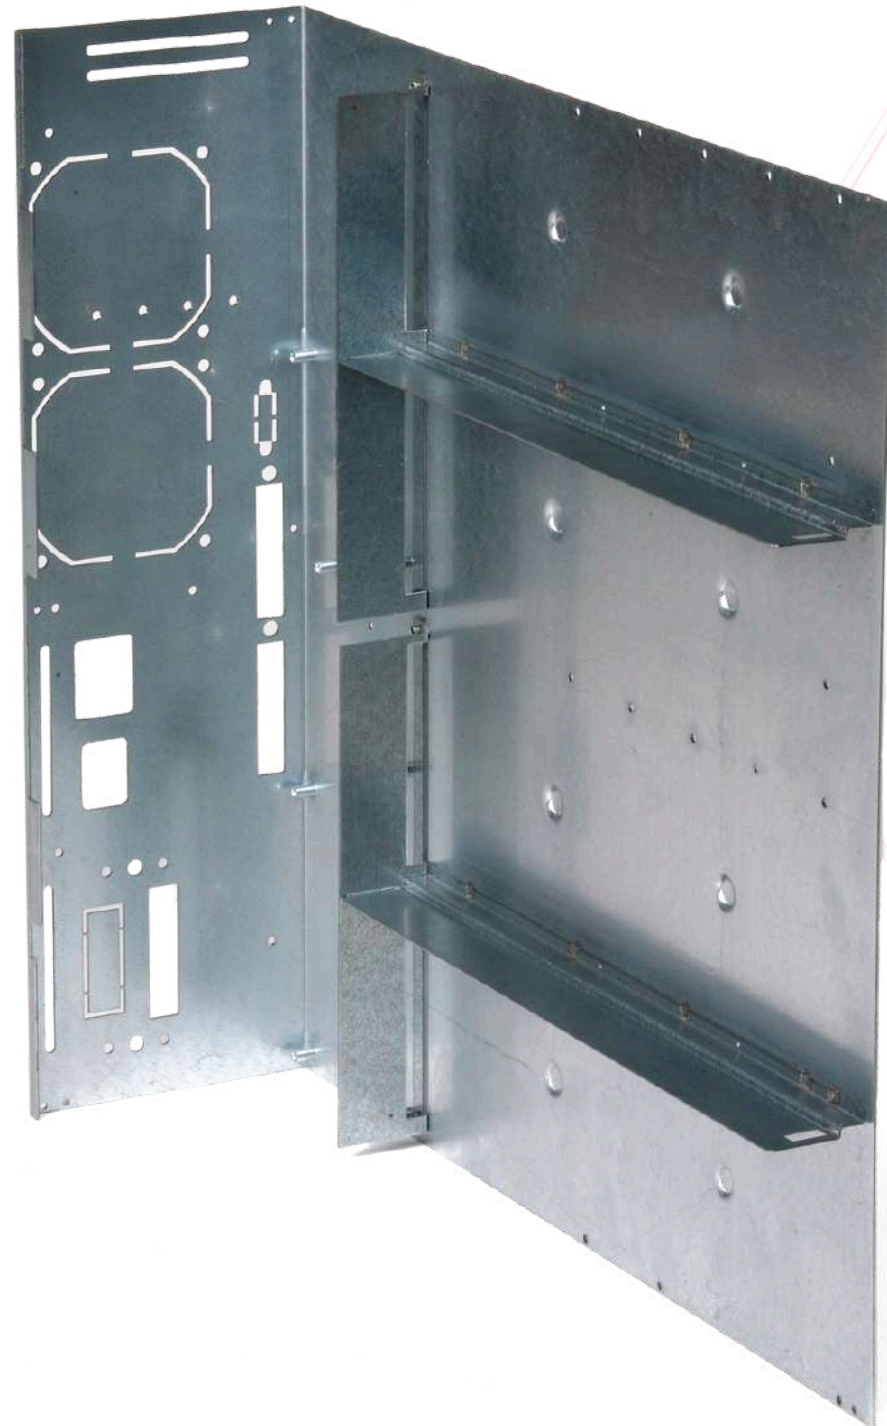

The modern punching and paneling lines enable the Boschetti Group to efficiently serve markets such as office furniture, vending, and air conditioning, offering customers a high level of quality. The production lines can punch, shear, and bend sheet metal fully automatically and are currently recognized as some of the most efficient Flexible Manufacturing Systems (FMS) for sheet metal processing on the market. The paneling can be provided complete with internal insulating or sound-absorbing panels.

PANELS

Thanks to its acquired expertise, the Boschetti Group is able to produce parts and complete assemblies involving all phases of welding, painting, and assembly. The certifications obtained allow for welding on high-strength steels and aluminum. A comprehensive range of machines, including CNC machining centers, TIG, MIG, and MAG welders, welding robots, and projection spot welders, enables the company to support customers from design through to the finished piece and testing.

WELDED AND ASSEMBLED SETS

Metal components produced in the stamping department for the automotive, electronics, and electromechanical sectors are made using high-productivity modular progressive dies. The Boschetti Group is capable of producing stamped parts with thicknesses ranging from 0.5 mm to 4.0 mm and performing blanking of parts up to 400 tons.
