

OUR STRONG POINTS

1. Many years of presence and tradition, together with a strong financial position.
2. A full range of modern machines for the most common sheet machining operations.
3. Highly qualified staff and customer oriented activity.
4. Implementation of the Disaster Recovery procedure and Business Continuity Plan, thanks to three production sites.

TURNOVER

FACTS & FIGURES

- N° 6 Laser cutting centres
- N° 6 Punching machines
- N° 3 Panelling lines
- N° 17 Bending presses
- N° 16 Die-forming presses up to 400 tons
- N° 1 Powder painting plant
- N° 1 Bending presses: automatic toll changing
- Manual and fully automated welding centres and assembly lines
- Manufacturing area of 23,000 sq.m

The Boschetti group provides the following services:

- Die-forming and shearing
- Laser cutting and punching
- Panelling
- Bending
- Mechanical machining
- Accessory machining
- Pre-painted sheet machining
- Just in time laser cutting
- Steel and aluminium welding

MARKET SECTORS

- Heating
- Vending machines
- Office furniture
- Automotive
- Electric pumps / Solenoid valves
- Industrial electronics
- Air-conditioning
- Textile machines
- Slot machines
- Industrial vehicles
- Gate automations
- Heavy duty vehicles
- Dentistry machines
- Food machines
- Alternate motors

BOSCHETTI GROUP

Metal sheet solutions for industrial applications

BOSCHETTI: AN ITALIAN GROUP

BOSCHETTI ARMANDO

Established in 1956, today Boschetti Armando S.r.l. is an important Italian enterprise in sheet machining. ISO 9001 certified and equipped with cutting edge technology, is a major supplier in automotive, vending, heating and air-conditioning, industrial electronics, automation, power supply industries, and in many other markets. The installed machinery allows the use of iron, aluminium, brass, stainless steel and copper sheets.

BETA MECCANICA

BM Beta Meccanica S.r.l. was established in 2002 in the province of Chieti, and it's specialised in manufacturing cabinets for slot machines, stove bodies, aluminium structures and baskets for lifting systems, component for agricultural and earth-moving vehicles. Following market demands, it has created partnerships with external design studios in order to combine technical know-how and style. Strong points of the company are the ability to weld and assemble products or sub assemblies, providing full tested process.

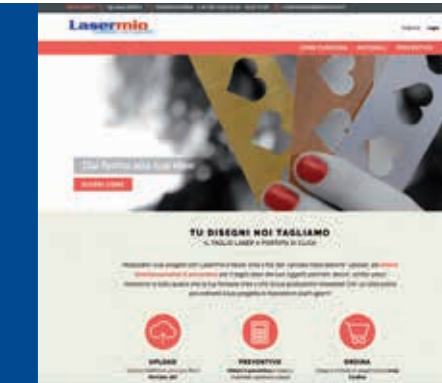

BETA STEEL

Beta Steel S.r.l., ISO 9001 certified, provides office metal furniture as well as components for vending, heating and air-conditioning markets. The company has developed a strong know-how in machining pre-painted materials and thin materials. The current plant in Lonigo (Vicenza), which covers more than 11,000 sq. m, has complete punching and panelling lines, a modern powder painting line, welding shops, and assembling areas.

LASERMIO is the online laser cutting service created by the Boschetti Group. Using existing know-how and plants, through this Web platform you can order laser-cut parts directly from www.lasermio.com, getting a quotation in real time. The parts are delivered in 4 working days.

soluzioni in lamiera per l'industria

LASER CUT AND BENT

Thanks to the installed machines, the Boschetti Group can laser-cut parts up to 20 mm thick. The latest-generation fibre lasers can also be used for copper and brass. Several 6 - 8 axis CNC bending presses can also be used for 4 m length sheets.

PANELLING

The company's modern punching and panelling lines allow the Boschetti Group to efficiently operate in different markets such as office furniture, vending machines, air-conditioning and heating, offering to customers the best quality level. The production lines can punch, shear and bend the metal sheets in a fully automatic process and are recognised as being the most efficient flexible systems on the market. Boschetti Group, can provide thermal/acoustical insulated panels.

WELDED AND ASSEMBLED UNITS

Thanks to its acquired skills, the Boschetti Group can produce fully welded, painted and assembled parts. The acquired know how, as well as quality certifications, allows welding on high resistance steel and aluminium. A wide range of machinery, (i.e. numeric control mechanical machining centres, TIG, MIG and MAG welding machines, welding robots and projection spot welding machines) allows Boschetti to meet all customer's requirements, from design to assembled and tested parts.

CUT AND STAMPED

The metal parts produced in the stamping shop, are made using high productivity, modular progressive moulds. The Boschetti Group can produce parts with a thickness of from 0.5 mm to 4.0 mm with presses up to 400 tons. These parts are supplied mostly in automotive, electronics and electrical components markets.
